## ABOUT US

**PERGOTECH®** is the brand of our company, **ALTUN TENTE LTD.**, that consists of our architectural automatic shading systems product range and used in dealership agreements. Since 1980, we are serving worldwide with our international network and professional teams in the sector of architectural shading systems. As Pergotech®, we serve mainly towards architects, construction companies, hotels, restaurants, cafes, private villas, and individuals as their solution partners in their needs and projects for shading systems. We provide living spaces and solutions for every season's weather conditions by maintaining our customer-oriented view. Pergotech® has a large international network connecting our headquarters by dealers and distributors to every continent, providing customer-oriented and affordable solutions, quality, and expertise. We are continuously striving to achieve to be better in every area by giving our focus on innovation and R&D.

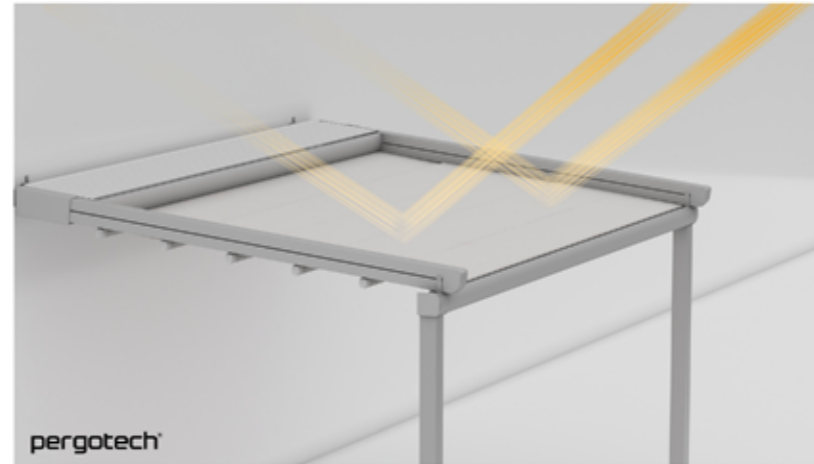

Exploring Outdoor Spaces for 40 years...

# PRODUCTS

PERGOTECH® auto-retractable railed awning systems are designed to fit and use in every weather condition. It is the strongest and the best quality option in roof closing systems. Operation is made by special tension and transmission. With the fabric we use that has special functions, system provides energy saving. The LED system that is used for internal lighting gives the structure additional aesthetics. Water drainage is provided by using special profiles, special wick and gasket systems for perfection. Structure is totally adaptable to be closed from all sides by Glass or Blind Systems if needed to provide an extra Outdoor living space. System operates by remote control and opens-closes within seconds.

# PRODUCTS general information

- 1- Fully retractable , enables the areas to be used effectively among the needs in every season.
- 2-PERGOTECH® products; are designed not only for protection against sun but to use in every season and weather conditions. We use different fabrics , which have different permeability and transparency for different solutions to your needs , yet all fabrics we use are designed for protection from sun, rain and wind , all are UV protector fabrics which are designed by the Top producers of Europe.
- 3- Our large lighting options provide you extra ambiance.
- 4- Our gutter system is integrated in to the profiles , giving you comfort in rain and snow.
- 5- Our systems are operated easily with remote control.

# TECHNICAL FEATURES

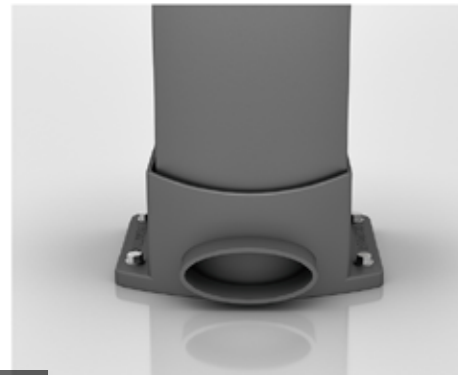

## PRODUCTS technical notes

**1-IMPERMEABILITY**  
Mechanism is made air tight by using 2 gaskets in rafters and one on the main profile while the system is in closed position.

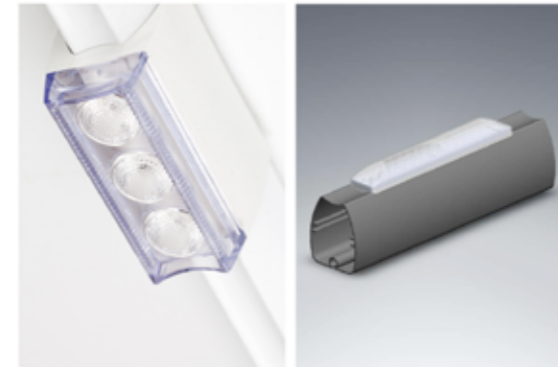

**2-DRAINAGE:**  
System makes the rain flow directly to the drainage inside the profiles, preventing any water to accumulate or leak.

**3-GUTTER:**  
Gutter is designed elegantly to not to be disturbed from water flow.

**4-PROFILES:**  
From main profile to rafters and tronsoms, all profiles have high resistance and engineering quality.

**5-LIGHTING :**  
All leds are designed by PERGOTECH®, dimmer option is also available.

**6- ACCESSORIES:**  
For a better elegant look, many accessories are used to cover the screws, metal or electrical parts.
